MANUFACTURERS AND SUPPLIERS OF
CONVEYOR AND BUCKET ELEVATOR CHAINS

CAST IRON ROTARY VANE FEEDERS

The NC series of High Wearing Ductile Cast Iron Rotary Valves provides those involved in Bulk Material Handling a drop through metering valve that provides a constant volumetric feed rate.

Rotary Valves are the first option where there is limited space and controlled feeding is required of powders and granular materials from silos, bins and hoppers.

The Multi Vane Rotor provides accurate dosing and reduces leakage from cyclones and dust collectors in to low and medium pressure pneumatic conveying lines. The same drop through valve can be utilised in feeding in to pneumatic conveying lines by the simple addition of a venturi Feeding Tee. Universal Flanges- we drill to your specification. Extra Thick Casing Walls.
